SUNPOWER SOLUTIONS

COMPANY PROFILE

Building secure, connected and future-ready digital ecosystems.

5G NETWORKS • CYBERSECURITY • IT INFRASTRUCTURE • DIGITAL SOLUTIONS

COMPANY

Executive Snapshot

A focused technology partner for high-performance connectivity, secure infrastructure and digital transformation.

Established

Sunpower Solutions Sdn. Bhd.
Registration No. 202401018183
(1564032-M)

Leadership

Director
Mohamad Nor Azizi bin Azmi

Company Type

Private Limited
Limited by Shares

Based In

Shah Alam
Selangor, Malaysia

OUR POSITIONING

Engineering reliable digital foundations for organizations operating in an increasingly connected world.

WHO WE ARE

Technology with execution discipline

We combine telecommunications, cybersecurity, IT infrastructure and digital solutions into integrated delivery.

Sunpower Solutions is a forward-looking technology company supporting organizations through secure connectivity and resilient digital infrastructure.

Our end-to-end approach spans deployment, integration, testing, optimization and operational support. The objective is consistent: deliver scalable platforms that perform reliably today and remain adaptable for tomorrow.

RELIABILITY • PRECISION • INNOVATION

Strategic partnership. Practical implementation.

CAPABILITIES

Four integrated capability pillars

Designed to connect infrastructure, systems and intelligent technologies with security embedded throughout.

01

5G Network Services

Network deployment, integration, testing and optimization for high-performance connectivity.

02

Cybersecurity

Security implementation focused on resilient systems, protected environments and cyber readiness.

03

IT Solutions

Enterprise infrastructure and systems designed for stability, scalability and operational continuity.

04

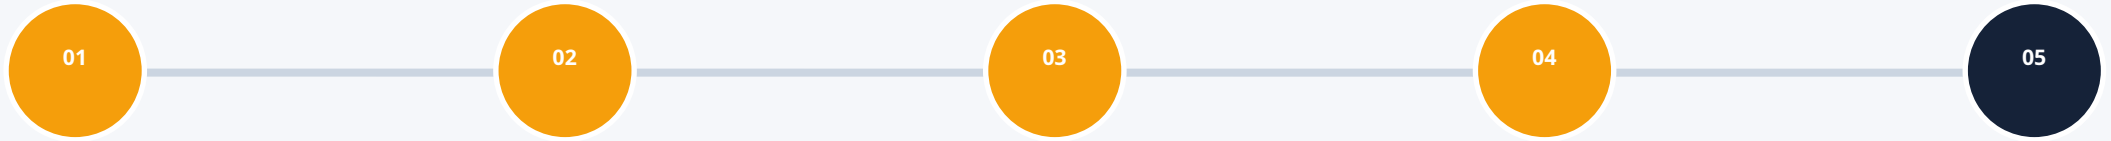

Digital Solutions

Technology platforms and digital initiatives that improve efficiency and enable business innovation.

DELIVERY

End-to-end project lifecycle

A structured delivery model that carries projects from deployment through sustained operational performance.

Deploy

Site and infrastructure deployment

Integrate

Systems and technology integration

Test

Validation and performance testing

Optimize

Tuning for reliability and efficiency

Support

Operational and lifecycle support

Outcome: secure, scalable and resilient digital environments with consistent performance across project phases.

EXPERIENCE

Representative project domains

Core delivery areas reflected in the company’s current project portfolio.

01

5G Site Deployment

02

Cybersecurity Implementation

03

Server & Data Center Deployment

04

Enterprise IT Infrastructure

VALUE PROPOSITION

Why Sunpower Solutions

A practical combination of technical depth, disciplined execution and architecture built for change.

Technical depth

Industry-grade expertise across 5G, cybersecurity and enterprise IT.

Execution precision

Efficient project delivery with focus on quality, performance and measurable outcomes.

Scalable architecture

Flexible digital foundations designed to support growth and evolving requirements.

Resilience by design

Security, stability and operational continuity embedded into solution delivery.

From connectivity to security, we focus on building digital environments that are dependable, adaptable and ready for the next stage of growth.

ORGANIZATION

Lean structure. Clear accountability.

A delivery-oriented organization connecting technical expertise, project management and business support.

DIRECTION

Vision & Mission

A clear focus on trusted partnership, advanced technology and operational outcomes.

VISION

To be a trusted technology partner in delivering advanced 5G, secure IT systems and digital innovation.

MISSION

To provide reliable, secure and high-performance solutions in 5G, cybersecurity, IT and digital technologies - helping clients achieve operational excellence and digital growth.

SUNPOWER SOLUTIONS

LET’S BUILD WHAT’S NEXT.

Partner with us to build secure, connected and future-ready digital solutions.
